

Launch of BOSS in Design

BVL Dec 2009

What is BOSS?

BOSS is our UK behavioural safety scheme. BOSS is a 'back to basics' approach that engages everyone and changes the way we think and act.

BOSS was launched on our sites in April 2008 and has made a significant improvement in our health and safety performance. The next phase of BOSS is to include our design personnel as well as site staff.

What is BOSS about?

BOSS concentrates on the simple, safe behaviours that we need and expect from everyone. By encouraging the right behaviour we will eliminate unsafe acts and situations from our workplaces.

To apply BOSS in the design office, designers are being asked to identify their own behaviours which could indirectly influence the safety on sites and to apply them consistently.

What happens now?

- The BOSS in Design launch will start during December.
- It will be launched by our design leaders and managers who have been trained as BOSS trainers.
- Our BOSS trainers will brief all design professionals in early 2010.

The success of BOSS is dependent on everyone's enthusiasm, support and engagement – so get involved and help us make a difference and achieve our target of 100% safe behaviour and Zero Incidents.
