

## Skip Sign Generator

It is a requirement of the Galliford Try Waste Management Standard (HS&E-STD-W01) that all waste containers are adequately labelled, with labels that specify and describe its contents. To help support Operations Management teams in this requirement, Galliford Try have developed a new skip sign generator (SSG).

The new SSG replaces the existing 'PDF' skip signs on the GT Intranet and has been set up to cover the most common types of waste generated on Galliford Try sites. The SSG has been designed to allow the user to generate skip signs that automatically include the correct EWC code and waste description without the user having to refer to reference information. Additionally, the SSG allows for customisation with a business unit specific logo and site or office based text options.

### Posters are generated in 4 easy steps:

**Step 1:** Select the site or office option

**Step 2:** Select the waste type you require from the drop down list

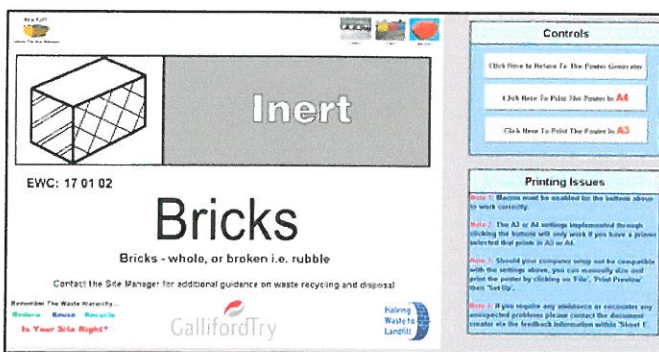

**Step 3:** Select the business unit logo you require

**Step 4:** Click button to generate poster

Skip Sign Generator	
Step 1:	Please select location (Office or Site) from the drop down list below. <input type="text"/>
Step 2:	Please select the waste type from the drop down list below. <input type="text"/>
Description:	<input type="text"/>
EWC:	<input type="text"/>
Category:	<input type="text"/>
Step 3:	Please select your business unit from the drop down list below. <input type="text"/>
Step 4:	<input type="button" value="Click Here To Preview The Poster"/>
Issue Date: April 2011 <span style="float: right;">Version: 2.0</span>	

**NOTE:** When opening up the SSG, Macros **MUST** be enabled to allow this process to work correctly.

The SSG will then allow you to preview the poster and then provide printing options in either A3 or A4.

The SSG can be located by going to the Health, Safety and Environment Directory contents page (Link Below), then clicking on 'Waste Labels'.
