

Don't Walk By

Ever been involved in a serious accident? Ever been involved when something failed, a bit of plant, a structure collapsed?

What are usual reactions?

- Somebody should have done something
- That was an accident waiting to happen

Should somebody do something? Yes – we all should.

Turn Your Concerns Into Action

Don't Walk By

Ask Yourself:

- Does it look right to me?
- What could go wrong?
- What would cause it to go wrong?
- What could I do to prevent it?

[With the attendees, use examples of unsafe conditions on site and work through the questions above as a group]

What Can You Do About It?

- Take responsibility for your own actions
- Be an honest friend to those you work with
- Bring to the attention of your supervision and site management any unsafe acts or conditions
- Contribute wherever possible in making our workplace a safer place
- Don't Walk By
